

COMPANY OVERVIEW

There is strength in numbers and it becomes even more powerful when combined as a single, effective force. **The K-Line Group of Companies is one such force.** By integrating and aligning industry-specific divisions under one powerful organization, The K-Line Group provides complete, **one-source solutions for the high voltage and related sectors.**

Head Office:

12731 Highway 48, Stouffville, Ontario L4A 4A7 • Telephone: (905) 640-2002 • Fax: (905) 640-8887
37 Sandiford Drive, Unit 107, Stouffville, Ontario L4A 3Z2 • Telephone: (905) 640-0660 • Fax: (905) 640-8566

Western Divisions:

5 Industrial Drive, Emerald Park, Saskatchewan S4L 1B7 • Telephone: (306) 781-2711 • Fax: (306) 781-2869
#4, 310 - 39th Street North, Lethbridge, Alberta T1H 5T8 • Telephone: (403) 327-2269 • Fax: (403) 327-2285

Industry-Specific Divisions

With utilities, industrial and commercial customers, The K-Line Group takes responsibility for every phase of a power project from initial financing and consulting through to design and construction as well as commissioning and ongoing maintenance.

The K-Line Group of Companies has a long-standing history of excellence dating back to 1967, when public utilities first began to see the cost and time benefits associated with outsourcing high voltage projects. A preferred partner then because of its superior work and established safety record, The K-Line Group continues to be an integral partner/service-provider offering clients a complete range of high voltage expertise. Today, as the power industry continues to reinvent itself, The K-Line Group has become increasingly invaluable as a dependable, expert resource for on-time, on-budget, safety -driven power projects.

For The K-Line Group's customers, the benefits of using its complete line of services and products are substantial. Economies of scale are realized at every turn and the one-source solution means the processes are unified, which promotes efficiencies, time saving and cost reductions.

A significant advantage for customers is the K-Line Group's vast range of project experience, encompassing all aspects of the modern high voltage industry, which allows for a seamless transfer of knowledge and associated best practices. This sharing of expertise in engineering, procurement and construction methods further empowers it customers to meet project objectives, budget restraints and restrictive time schedules.

The K-Line Group of Companies is comprised of four companies: K-Line Maintenance & Construction Limited, K-Tek Electro-Services Limited, K-Line Insulators Limited, and K-Line International Limited. Within these four organizations are industry-specific divisions that address the engineering, design, procurement, construction, commissioning and maintenance of high voltage power delivery systems as well as providing temporary power services for large-scale construction sites. Independent laboratory testing and complete fleet repair and refurbishing services are also available.

K-Line Maintenance & Construction Limited

Substations

Design, procurement, construction and maintenance of substations up to 230kV including modifications, retrofits, and upgrades of existing facilities.

Overhead Lines

Design, procurement, construction and maintenance of overhead distribution lines in both high-density urban areas and remote locations.

Temporary Power

Design, build, installations, maintenance and removal of job-site specific temporary services, including transformers, substations and overhead lines. From 100 amp to 2000 amp; 120v to 27600v.

Fleet Services

Minor mechanical repairs and major refurbishments of utility vehicles. Certified licensed mechanics, professional paint booth and machine shop on site.

Power Services

Preventative maintenance, painting, and high pressure washing of distribution equipment to improve system reliability.

Transmission

Design, procurement, construction and maintenance of transmission infrastructure.

Underground

Installation of underground utilities inclusive of fiber, telecommunication, gas, power, and water.

Laboratory Services

Full range of testing services for personal protective equipment and live line tools.

Emergency Services

Restoration services in response to ice storms, flooding, fire and/or other emergency situations.

K-Tek Electro-Services Limited

This licensed consulting engineering division specializes in the design, commissioning, maintenance and testing of power services, including detailed engineering studies and comprehensive system analysis.
